WARNING: After I have received the following email from the Mediafire, the software was removed from the website and I had to manually delete the comments. I simply didn't realize that a hacker had access to my code and he was able to create another version of the game where he removed the code of the installation files. The version of the game that is on the mediafire, on the other hand, is the original one. So if you downloaded this version, you should have the installation files of the installation file of the developer. I will try to provide a new installer and you can download the new installers from the links below. But until now, I have no idea how to
