From then on editors had to break their story up into clips and craft a narrative that didn't start and end each time. Of course, this means special skills have become mandatory for editors, as each "story" has to be crafted from a wide variety of media, like time-lapse, slow-motion, and HD videos. Also, editors will have to master merging several clips together and performing tasks while maintaining continuity. hacker culture was important to me. I would spend my free time as a teenager programming; I lived on an Internet cafe; I loved tinkering with cool technology, like LED displays and music generators. That's when I first heard about Ada, the hacker heroine from the Hitchhiker's Guide to the Galaxy. That story and the idea of a benevolent artificial intelligence fascinated me. I made it a goal to work for an AI that makes a positive impact. Each hackathon provides meaningful work for an individual, how the organization looks to the world, and an opportunity to learn skills and gain experience. Through these activities I learned more about community organizing, nonprofits, and the sector that I wanted to work in. Joining San Jose City College is a great opportunity for me because it gives me the ability to build a strong knowledge-base to help me become a better professional. I look forward to meeting and mentoring students from all walks of life, including those who are from humble beginnings. I look forward to helping students grow into well-rounded, professionals who are educated and sought after across numerous industries. I am thankful that I have obtained a position at this fine institution despite not completing a college degree. This is a testament to my hard work and tenacity as well as the funding that I have been able to obtain. I recognize that there are hundreds of young people who cannot fully benefit from the knowledge that individuals like me possess: the individuals who are willing to take part in such efforts. 933d7f57e6
