Once you have opened a new blank document and are ready to create one, first you need to select the size of the document. You can create a document as small as 8 by 8 pixels or as large as 4000 by 4000 pixels. Next, you need to decide what kind of file type you want to use. There are many different types of file types and the file type that you choose will depend on how you plan to use the file.
