For a detailed description of the Color Picker, see "Create a Gradient" on page 19. Click on one of the three blue dots to create a new layer. Select the shape tool and the image from your desktop or photo editor to add the object to the canvas. Clicking the attachment icon allows the user to drag and drop the image into the new layer directly from the desktop or photo editor. The Move Tool allows you to scale, rotate, and reposition your content. Select the Move Tool and the object from your desktop or photo editor. One thing to note is that the object will be connected to the canvas if it's a straight line, whereas if the object has a curve, it'll open a new channel. To connect to the new channel, drag the anchor point around. To explain, here's a simple shape drawn in your notebook: If you want to resize an object on the canvas, use the Graphic Selection Tool, which is the tool that allows you to select objects by color, stroke, or shape. The grid tool is amazing when you're working with large images and logos. To learn about the grid tool, see the article "How to Use the Photo Grid Tool" on page 7.
